

Vaping, Concentrates, and Edibles

There is an alarming trend with both middle and high school students using vapes and becoming addicted to nicotine. The newest statistics out there state 1 in 5 High School students have used

THC concentrates in a vape device. This program will help you learn all current information about EID's. You will become familiar with what harmful toxins, chemicals, and diseases are associated with vaping.

Marijuana concentrates will be reviewed and discussed along with the legal ramifications of having devices and or other paraphernalia. Marijuana edibles and the current trends with these products will also be explained. You will leave with information on how to talk to your child and help them make healthy educated decisions about vaping and concentrates.
