If your child's birthdate precludes him/her from receiving the necessary Health Requirements prior to September 1, please contact your child's School Nurse.

Required Tuberculosis Testing in New Jersey Schools for 2019/2020

Justification: To restrict tuberculin skin test screening in New Jersey schools to teachers/other employees and only those students who are at highest risk for latent TB infection.

- I. Only a positive interferon gamma release assay test (IGRA) result or a Mantoux intradermal test using 5 TU of stabilized PPD tuberculin skin test result measuring ≥ 10 mm of induration shall be considered a “significant reaction”.

- II. The following tuberculin skin testing requirements apply to **ALL** school districts:
 1. Students born in a country that is not listed on page 3 and entering school in the U.S. for the first time, regardless of age or grade.

 2. Students transferring into the New Jersey school system directly from a country not listed on page 3, regardless of age or grade.

EXCEPTIONS FOR BOTH GROUPS OF STUDENTS LISTED ABOVE:

Entering at preschool through 5: Tuberculin skin testing is not required if the student has documentation of an IGRA or a Mantoux tuberculin skin test at the age of three years or older, regardless of the result of that skin test.

Entering at grades 6 through 12: Tuberculin skin testing is not required if the student has documentation of a negative tuberculosis test in the last six months or a positive skin test, regardless when this test was done.

Tuberculin skin testing is not required if the student has attended school in another state prior to entering the New Jersey school system.

Any student with parents claiming religious exemption cannot be compelled to submit to tuberculin skin testing. In these instances, a symptom assessment must be done. If TB-like symptoms are reported, a physician must document that the student does not have active disease. Please contact your school nurse for necessary forms.

**THE FOLLOWING COUNTRIES HAVE A LOW INCIDENCE OF TB AND
REQUIRE NO TB TESTING**

Albania	Jamaica
America Samoa	Jordan
Andorra	Lebanon
Antigua and Barbuda	Luxembourg
Australia	Malta
Austria	Monaco
Barbados	Montserrat
Belgium	Netherlands
Bermuda	Netherlands Antilles
British Virgin Islands	New Zealand
Canada	North Ireland
